

## About us

The Amtech System house was founded in 2009 as a legal successor of Admin-Soft limited (2005). Our company has more than 10 years' development experience and works with 23 employees (project managers, developers, testers, etc.) The annual income exceeds 1 million USD and increases from year to year.

## Our products and services

Our exclusive mission is to develop and implement business applications with customized functions. As a result of our work, the client doesn't have to use Excel tables and also has a chance to eliminate any obsolete software. These easy-to-use applications are custom tailored to meet the customer's requirements. Of course we also maintain the software in this ever-changing world.

## Our target group

Our products suit concerns that employ at least 10 employees and would like to grow and step up to a higher level. The goal is to create the ultimate and unique solution for your company through a rich set of reports to support decision making.

## Our references

11 Hungarian embassies around the world have been satisfied running our software. Additionally a large number of uniquely developed applications help our clients to make money. For more a detailed list of our favorite clients please visit:
